

ARCERIV

EVENT CALENDAR 2026

Romanian Association of Veterinary Minimally Invasive Surgery

Workshops & Masterclasses with International Faculty

Hosted at the **Surgical Training Institute (STI), Bucharest**

ARCERIV, led by **Dr. Constantin Ifteime**, is an association dedicated to advancing veterinary endoscopic surgery and interventional radiology.

Our mission is to raise the standards of veterinary care by promoting minimally invasive surgical techniques, supporting innovative research, and providing specialized professional training for veterinarians across Romania and beyond.

We believe in continuous progress and in creating meaningful opportunities for veterinarians to expand their skills. **ARCERIV** brings together a community of dedicated professionals who share a passion for modern, patient-centred surgical care.

Our workshops and conferences focus on practical, hands-on learning, allowing participants to work directly with advanced equipment, real case simulations, and internationally recognized instructors.

Through ongoing educational programs, **ARCERIV** equips veterinarians with the knowledge, confidence, and technical expertise needed to successfully integrate the latest advancements in endoscopy and interventional radiology into their daily practice.

All **ARCERIV** training programs and workshops are held at the **Surgical Training Institute (STI)** in Bucharest, a state-of-the-art center designed to support high-level surgical education.

Join us as we continue to drive innovation and shape the future of minimally invasive veterinary medicine in Romania.
